

To whom it may concern:

My name is John Smith and I am writing in support of the Naturopathic Doctors to be able to prescribe prescription medications. ND's are highly educated and are qualified to do this. Most ND's will be hesitant to prescribe medicine as they are more focused on doing things naturally. I feel confident that they will use drugs as a last resort and they do know how to use them and prescribe them as they are to be used. This is for patient convenience also, sometimes there are times when an ND knows that a patient needs a prescription and has to send a patient to an MD this is not helpful to the patient or doctors as we are in a shortage of doctors as it is.

John A. Smith
